Material Safety Data Sheet
SUCRALOSE

Section 1: Chemical Product and Company Identification

<table>
<thead>
<tr>
<th>Product Name:</th>
<th>Sucralose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customs Tariff No:</td>
<td>29400000</td>
</tr>
<tr>
<td>Synonym Name:</td>
<td>Sucralose; 4,1',6'-trichloro-galacto-sucrose</td>
</tr>
<tr>
<td>Chemical Formula:</td>
<td>C₁₂H₁₉Cl₃O₈</td>
</tr>
</tbody>
</table>

Company Information:
Chemtrade International
Rm. 201, Unit 3, Building 8, Shijia Garden, No. 93, Xiangjiang Road, Qingdao Development Zone, Qingdao, Shandong, China 266555
Tel: 0086-532-86893005
Fax: 0086-532-86893005

Section 2: Composition and Information on Ingredients

<table>
<thead>
<tr>
<th>Name</th>
<th>CAS No.</th>

Section 3: Hazards Identification

Potential Health Effects:
No adverse effects expected.
Primary Route(s) of Entry: Inhalation/Ingestion.
Eyes: No adverse effects expected.
Skin: Sustained exposure in a dusty manufacturing environment may result in irritation in the creases of the skin, particularly at the fingers and hands.
Ingestion: Material is an intensely sweet, non toxic crystalline powder. No adverse effects expected.
Inhalation: Exposure to high airborne concentration may cause mild respiratory irritation.

Section 4: First Aid Measures

No treatment necessary under ordinary circumstances. Use good personal hygiene - wash thoroughly with soap and water after handling.
If any redness or irritation develops, contact a physician.
Eyes: No special treatment under normal circumstances - flush with water
Skin: No special treatment under normal circumstances - flush with water
Ingestion: No special treatment under normal circumstances- drink copious amounts of water or milk
Inhalation: No special treatment under normal circumstances- move to fresh air
Note to Physician:
Sucralose is safe for human consumption based on extensive toxicological studies. Material is an intensely sweet, crystalline powder. Exposure to high airborne concentration may cause mild respiratory or eye irritation.

Section 5: Fire and Explosion Data

Fire fighting Measures - Stable under normal conditions. Dust Hazard Classification (NFPA-68) is St-2, the formation of flammable/explosive air/dust mixtures is possible. Appropriate measures should be employed to minimize the potential for dust concentrations in the flammable range. It is recommended that all dust control equipment and material transport systems involved are engineered to prevent conditions contributing to dust explosions.

Flammable Properties: Stable under normal conditions. Sucralose, when heated at elevated temperatures, may break down with the release of carbon dioxide, carbon monoxide and minor amounts of hydrogen chloride. Heavy concentrations of sucralose dust may create conditions contributing to dust explosions.

Fire and Explosion Hazards: Minimum spark ignition energy: 0.40 Joules Minimum ignition temperature: 390°C (734 OF) Minimum explosion concentration for dust: 16.5 g/M (0.165 oz/Ft) (similar to a dense fog).

Extinguishing Media: Use any media which is suitable for the surrounding fire: water, dry chemical, foam, CO₂, etc.
**Fire fighting Instructions:** Wear self-contained breathing apparatus and full protective gear evacuate personnel to a safe area.

### Section 6: Accidental Release Measures

No special clean-up procedure is necessary. Avoid creating conditions that will contribute to high concentrations of sucralose dust. Carefully dampen and sweep or vacuum up into appropriate sealed waste container for disposal.

### Section 7: Handling and Storage

**Handling Precautions:** Avoid creating dusty conditions. While no special respiratory protection is required, a dust mask, gloves and other good industrial hygiene practices to minimize worker exposure will result in a more comfortable work environment.

**Storage Precautions:** Store tight covered container in a cool dry area preferably in Doucette’s supplied drum packaging.

### Section 8: Exposure Controls/Personal Protection

**Engineering Controls** It is recommended that all dust control equipment and material transport systems involved are engineered to prevent conditions contributing to dust explosions.

**Eye/Face Protection** Eye protection consistent with good laboratory practices or good industrial hygiene practices for handling powders is highly recommended.

**Skin Protection** Use good industrial hygienic practices.

**Respiratory & Other** While no special respiratory protection is required, a dust mask, gloves

**Protection (rubber or plastic) and other good industrial hygiene practices to minimize worker exposure will usually result in a more comfortable work environment**

**Other/General Protection** Wear a hair cap.

### Section 9: Physical and Chemical Properties

**Appearance** White to off-white, fine powder

**Odor** Practically odorless

**Odor Threshold** N/A

**Basic Physical Properties**

- Boiling Point: N/A
- Melting Point: 130° C (266°F) with decomposition
- Vapor Pressure: <1 mmHg
- Solubility (H2O): complete 30% w/v at 25°C (77°F)
- PH: Neutral in aqueous solution.

### Section 10: Stability and Reactivity Data

**Stability:** Stable under normal conditions (temperature, pressure and humidity. Sucralose, when heated at elevated temperatures, may break down with the release of carbon dioxide, carbon monoxide and minor amounts of hydrogen chloride.

**Conditions to Avoid:** Prolonged storage at elevated temperatures (>38°C, or> 100°F) or high humidity.

**Incompatible Materials:** Powerful reducing or oxidizing agents, strong alkalies.

**Hazardous Decomposition:**
Carbon dioxide, carbon monoxide and minor amounts of hydrogen chloride.

**Polymerization:** None known

**Hazardous Polymerization:** None reported

### Section 11: Toxicological Information
**Acute Studies**: Material is a non-toxic food additive conforming to Food Chemical Codex and USPINF. Oral rat LD$_{50}$ > 10 g/kg; Oral mouse LD$_{50}$ > 16 g/kg - no mortalities reported even at the highest tested doses.
